DRAFT

An open letter to all voting Americans

The right to vote is constitutionally guaranteed to American citizens. When maladministration of elections occurs, our fundamental right to select our representation is lost.

Based on analysis of public data, it is clear that our elections are not administered fairly. For years, the number of registered voters in Michigan has exceeded the voting age population. Our **voter rolls have more voters registered than there are people of voting age living in the state!** We have no assurance that ballots go out to only real voters when the voter registration rolls are "dirty." In Michigan, the 2020 general election was certified with nearly **twenty thousand more ballots cast than the number of identifiable voters.** Careful study of the ballots cast statewide reveals an impossible pattern in voter turnout. The relation between the number of voters registered and the number of ballots cast (**voter turnout**) **is exactly the same in every county!** This suggests that **ballots were issued and cast systematically** over and above requests by actual voters.

Elections belong to We the People. It is up to each of us to take action now. By reading this, you are at the first step: recognition of the problem. The second step is how to solve it. We the People must work together. As citizens, we have the constitutional power to restore fair elections. It takes a lot of us to do it. Please share this letter. Then contact me at handcountlenawee@proton.me. By taking these two simple actions, you will make the difference.

EXPRESS TRAINING

EMPOWER the PEOPLE

Hand Count Training
in 60 minutes

In about 60 minutes a single trainer can teach from 5 to 500 people (or more) how to hand count. This creates a legion of election workers ready to hand count elections across the country. America's greatest strength is the citizens who rise to the occasion, just like they did in the 1940's by planting Victory Gardens to feed the nation. Hand counting elections will "Empower the People" and is our foundational strategy for hand counting. It is "the Victory Gardens" of our day.

"Hand Counting is the Victory Gardens of our day"
